

MainConcept is a leading provider of video codec technology, ranging in offerings from software development kits, transcoding applications and plugins serving professional video production, multimedia, broadcast, digital signage, medical, and security industries. Our engineering and development teams focus solely on creating encoding and decoding components for video and audio content, enabling us to provide best of breed solutions to our customers. In addition to outstanding products, our attention to detail and devotion to customer support and satisfaction is geared to not only meet, but exceed the expectations of even the most demanding customers. MainConcept is headquartered in Aachen, Germany and is a subsidiary of Endeavor, LLC. For more information about MainConcept, visit [www.mainconcept.com](http://www.mainconcept.com).

To support our team in Aachen, we are looking for a:

## TECHNICAL ACCOUNT QA ENGINEER (F/M)

### Full-time

We welcome candidates with experiences in software testing methodologies, including test design, iteration planning and defect tracking. Beyond that, the candidate should enjoy working with customer specific test scenarios in pre- and post-sales responsibilities.

#### REQUIRED SKILLS AND EXPERIENCE:

- 2+ years of experience in testing complex software applications
- Solid technical and intuitive understanding of how software works (and breaks)
- Experience with one or more scripting languages (Python, Lua, etc.)
- The applicant must be able to read and understand C/C++ source code
- Working knowledge of software development lifecycle principles and QA methodologies
- Proficiency in test automation design and implementation for complex products
- Building and running test cases that replicate complex customer workflows
- An understanding of the software development lifecycle
- Energy and desire to deliver high-quality software on aggressive schedules
- Excellent written and verbal communication skills (English and German)

#### ADDITIONAL NICE TO HAVE PREFERENCES & REQUIREMENTS:

- Experience working with distant and international teams
- Experience testing native multimedia software, across a range of platforms including Windows, Mac, Linux, embedded systems and consumer electronics devices
- Ability to create test plans and define test cases from established project requirements, functional and design specifications
- Experience using software test tools and knowledge of how to properly interpret their results

- Experience with Quality Assurance best practices and varied engineering processes (scrum, kanban)
- Experience with bug tracking tools
- Familiar with source code control systems like SVN or GIT
- Knowledge of web languages like html, php, etc would be a big plus
- Shell programming under OSX, Android, iOS
- C/C++ knowledge to adjust samples for customer demos is a plus

#### GENERAL REQUIREMENTS:

- Full employment
- Desire and ability to work in team
- Professional initiative
