Successful production workflows need to do more than encode video and audio. For professional broadcast delivery, these streams must be interleaved as well. When it comes to MPEG-2 Transport Streams, all streams must follow the standards whether using a proprietary solution or open-source software, such as FFmpeg. This is where the MainConcept MPEG-2 TS Broadcast Delivery Plugin for FFmpeg comes in.

**MPEG-2 TS STANDARDS FOR DIGITAL TV BROADCASTING**

The MPEG-2 TS Broadcast Delivery Plugin for FFmpeg allows broadcasters to use MainConcept’s market-proven MPEG-2 Transport Stream Multiplexer natively within an FFmpeg workflow to generate DVB and ATSC compliant content. The plugin can be deployed on-premise or in the cloud for both streaming and file mode-based use-cases. The MainConcept MPEG-2 TS Broadcast Delivery Plugin goes beyond FFmpeg’s native TS multiplexer, enabling you to do even more!

**CHOOSE THE BEST FROM MAINCONCEPT & FFmpeg**

The easy-to-integrate FFmpeg Plugin supports AVC/H.264, HEVC/H.265 and MPEG-2 video as well as AAC and AC-3 audio streams. It seamlessly integrates with other MainConcept Video Encoder Plugins for FFmpeg (AVC/H.264 & HEVC/H.265), plus FFmpeg’s built-in video encoders, such as MPEG-2.

The MainConcept MPEG-2 TS Broadcast Delivery Plugin for FFmpeg allows creation of Single-Program Transport Streams (SPTS) or Multi-Program Transport Streams (MPTS), depending on your requirements. The pre-defined broadcast format multiplexer profiles are suitable for those markets where digital TV content creation is key.

**ADVANCED MAINCONCEPT MULTIPLER SETTINGS FOR FFmpeg**

The MainConcept MPEG-2 Transport Streamer Multiplexer within the MPEG-2 TS Broadcast Delivery Plugin for FFmpeg offers the same options and parameters available in the MainConcept SDKs. All muxer, stream and program settings can be controlled via ready-to-use MainConcept config files. A set of editable sample config files for various use-cases come together with the MainConcept MPEG-2 TS Broadcast Delivery Plugin package so that they can easily be applied in your FFmpeg workflow or service.

MainConcept MPEG-2 TS Multiplexing also comes as part of the full-featured MPEG-2, AVC/H.264 and HEVC/H.265 Encoder SDKs.

**CREATE SPEC-COMPLIANT BROADCAST STREAMS FROM A VARIETY OF SOURCES**

**EASY INTEGRATION**

A simple plugin approach brings MainConcept® encoders into your new or existing FFmpeg environment.

**BROADCAST VIDEO & AUDIO SUPPORT**

Support for AVC/H.264, HEVC/H.265, MPEG-2 video and AAC, AC-3 audio.

**ADVANCED FEATURES**

Gain full control over all MPEG-2 TS Multiplexer settings for broadcast delivery formats.

**KEY FEATURES**

- Support for SPTS and MPTS
- Support for up to four video and four audio tracks
- Ready-to-use multiplexer profiles for ATSC and DVB
- Straightforward integration with MainConcept Video Encoder Plugins for FFmpeg plus FFmpeg’s built-in video and audio encoders

**OPTIMIZE WITH MAINCONCEPT PROFESSIONAL SERVICES**

**OPERATING SYSTEM**

- Microsoft Windows 8, Windows 10 (64-bit, x86)
- Linux x86 Ubuntu 16.04 LTS, CentOS 7.4 glibc 2.17 (64-bit)
- Linux ARM Ubuntu 18.04 glibc 2.27, Ubuntu 20.04 glibc 2.31, CentOS 8 glibc 2.28 (64-bit)

MAINCONCEPT FFmpeg Plugins

The MainConcept FFmpeg Plugins are a highly flexible product line to use the industry-leading MainConcept libraries seamlessly in FFmpeg-based use-cases and environments. The simple plugin approach for fast integration into FFmpeg leads to quick results without the need to change your workflow. Full parameter control of the MainConcept SDK libraries in combination with FFmpeg’s built-in components brings world-class video and audio quality to your solution or service. MainConcept FFmpeg Plugins are free to try and easy to integrate into your workflow.

ABOUT MAINCONCEPT

MainConcept provides audio and video codec solutions that fuel creativity and business across the globe—from professional video production, multimedia, broadcast, digital signage, and gaming to the medical and security verticals. Our software development kits, transcoding applications and plugins deliver the simplicity you need with the customer experience you deserve. Since 1993, MainConcept codecs have been used by hundreds of organizations including Adobe, Autodesk, Corel, Dalet, Encoding.com, Endeavor Streaming, Grass Valley, Intel, MAGix, Nikon, PlayBox Neo and Soliton.
